July 2026

Subject: Application for Full Stack Developer / AI Developer / Data Analyst Role

Dear Hiring Manager,

I am writing to express my interest in opportunities where I can contribute as a Full Stack Developer, AI Developer, or Data Analyst. I am a solo builder who recently designed, developed, and launched two AI-powered SaaS products — QueryMind and Student Corner — entirely independently, from concept to live production with real payments and real users.

QueryMind (querymind.mukeshaitools.com) is an AI-powered SQL learning and database assistant. It supports PostgreSQL, MySQL, and MSSQL connections, offers AI-guided practice with 1000+ questions, and includes real-time query analysis — all built with Node.js, Neon PostgreSQL, Claude AI, Razorpay payments, and deployed on Vercel.

Student Corner (student.mukeshaitools.com) is an AI learning platform for Indian students preparing for NEET, IIT-JEE, CAT, GATE, and other competitive exams. It features AI-powered MCQ generation, World Map GK, Study Plans, and doubt solving with image upload — all with full authentication, trial periods, and live Razorpay payments.

Beyond AI development, I bring 5+ years of hands-on experience in data analytics. I have built interactive Power BI dashboards for financial, HR, mobile sales, and weather domains, performed Python-based EDA on real datasets, and executed advanced SQL analyses on e-commerce and banking data. My work is published with audio explanations and full documentation.

What sets me apart is my ability to take a product from zero to live — independently managing backend, frontend, database, payments, email, monitoring, and deployment. I am a fast learner who adapts quickly, communicates clearly, and delivers real, working solutions.

I am open to full-time roles, freelance projects, and collaborative opportunities. I would welcome the chance to discuss how my skills can add value to your team.

Thank you for your time and consideration.

Warm regards,

Mukesh Meena
